Hello students,

You are invited to complete a full-stack prototype assignment for Brandenbed Living Spaces as part of the selection process.

Task

Build two working prototypes using frontend and backend coding:

1. Company Landing Page (customer-facing)
   - Sections: Header/Navigation (Logo, Properties, About Us, Services, Contact, Sign In, Language toggle EN/DE)
   - Hero with headline, tagline, call-to-action
   - Quick Stats (500+ Properties Sold, 1200+ Happy Clients, 18+ Years Experience, 8+ Districts in Berlin)
   - Core Values, Services, Footer with contact and social links
2. Team Dashboard (internal tool)
   - Sidebar: Dashboard, Properties, Tasks, Tenant Queries, Rent Collection, Employees, Settings
   - Dashboard page: quick stats and charts
   - Rent Collection: Submit Payment form (Property, Tenant, Amount, Payment Type, Transaction ID), Payment History, Review Payments
   - Tenant Queries: issues list with status tags (Pending, In Progress, Resolved)
   - Properties: list with filters, Add/Edit option
   - Employees: list with roles and permissions

Ishwar Chawla
Marketing Executive

Deliverables

- Fully coded frontend + backend prototypes (desktop focus, landing page responsive for mobile)
- Source code repository link (GitHub/GitLab or equivalent)
- Short document (max 1 page) explaining tech stack and design decisions

Timeline

Submit within 5–7 days of receiving this brief.

Selection

Candidates will be shortlisted based on the functionality, code quality, and overall approach.
